

COUNTERPATH

Bria iPad Edition

Data Sheet

Bria iPad Edition

The next step in the deskphone revolution

Bria iPad Edition is a highly secure SIP-based softphone specifically designed for the Apple iPad and iPad 2. With Bria iPad Edition you can make and receive voice over IP calls using a Wi-Fi or 3G/4G connection, and add premium features like Video Calls or Presence and Messaging to enhance your mobile softphone experience.

Advanced User Interface

Bria iPad Edition's intuitive user interface provides:

- Seamless integration with CounterPath's Bria desktop softphones
- One-touch access to call management options such as voicemail, call history, contacts and more
- Intuitive in-call management features such as add call, mute, hold and speakerphone
- Separated navigation panes for easy access to tabs and content
- Popover dial pad is stylishly minimized but easily accessible at all times
- Auto-attendant support

PBX Extension

Bria iPad Edition becomes an extension to your PBX! As an increasing number of business professionals are using the collaborative tools found in tablet devices to aid in their work activities, Bria iPad Edition offers businesses an easy way to replace their deskphone or integrate their enterprises' voice solutions within the Apple iOS family.

Multiple Call Support

With multiple call support, users can quickly and easily handle incoming multiple calls, merge and split calls apart, and place users on hold with a simple tap to the user interface. The iPad SIP client leverages the award-winning usability from CounterPath's desktop softphone to enable dynamic call handling and increased productivity. With Bria iPad Edition, it's like taking your deskphone on the road.

Multitasking Support

Multitasking functionality allows Bria iPad Edition to run in the background while you use your iPad, allowing you to reference other applications while on a call.

Security

As voice communications have become more vulnerable to the same type of attacks that data has endured over the past two decades, enterprises are consistently trying to ensure that any software deployments are protected from vicious malware and viruses. Unlike other SIP-phone providers, with CounterPath's Bria iPad Edition you can take comfort that your calls are secure with advanced TLS and SRTP. Bria iPad Edition brings the same strength and protection offered in our Bria desktop softphone to your mobile device.

Where to Buy

The commercial version of Bria iPad Edition is available on the Apple iTunes Store. For customized versions of Bria iPad Edition, contact your CounterPath sales representative for more information (bulk purchases only).

Available on the iPad
App Store

Bria iPad Edition

The next step in the deskphone revolution

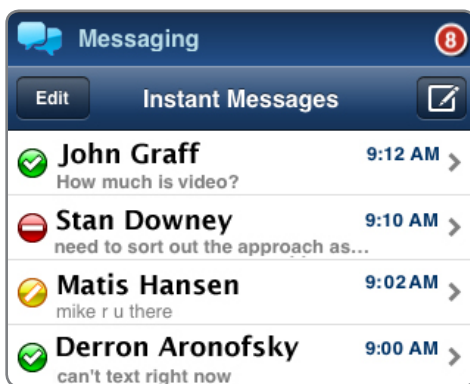

Premium Features

Want more than just voice calling? Bria iPad Edition includes premium feature add-ons such as Video Calls, Presence and Messaging, and audio codecs that can be purchased within the client. Simply go to the Premium Features button under the Settings tab to access and learn more about these features.

Presence and Messaging

Bria iPad Edition's Presence and Messaging add-on lets you connect with contacts on Google Talk, Facebook or other SIP-compliant instant messaging or chat platforms. It also enables you to utilize your IP PBX to send and receive Instant Messages with colleagues in real-time and see when contacts are available.

Video Calls

Enjoy face-to-face communications with Bria iPad Edition's Video Calls add-on for iPad 2. Utilizing either the forward or rear-facing camera on your iPad, you can make high definition video calls to your contacts using a H.264 video codec. Picture-in-picture view lets you see how you look to the person you're calling and you can rotate the screen to either portrait or landscape depending on your needs.

Audio Codecs

Boost your audio quality over 3G by purchasing the G.729 audio codec add-on. This codec provides excellent audio quality over limited bandwidth connections, such as 3G, and reduces the amount of data used – saving you even more money on your calls.

Bria iPad Edition

The next step in the deskphone revolution
