Release Notes for CounterPath Bria iPad Edition Version 1.1.0

October 17, 2011

New Features for Bria iPad Edition 1.1.0

Presence and Instant Messaging

Bria iPad Edition now supports presence and instant messaging for the XMPP and SIP SIMPLE protocols.

This feature is available as an **in-app purchase**. You need to purchase this feature separately in addition to Bria itself. To use this feature for SIP SIMPLE, your VoIP service provider also must support SIP SIMPLE.

With presence and instant messaging, you can:

- Create multiple XMPP accounts using Gmail and Facebook account credentials.
- Send and receive text-based instant messages with your contacts.
- Send SMS messages to PSTN cell phone numbers if your VoIP service provider supports this feature.
- Publish your online status to your contacts, and also see when your contacts are available/away/busy.

Setting up Presence and Messaging on your Bria

Whether you have upgraded your Bria from the previous version or just bought Bria for the first time, you need to purchase the Presence and Messaging feature separately. If you plan to use presence and messaging over SIP SIMPLE, make sure your VoIP service provider supports SIP SIMPLE before purchasing this feature.

To purchase this feature and set up your Bria:

1. Start Bria on your iPad.
2. Go to Settings > Premium Features.
3. Tap the price and follow the prompts to purchase the Presence and Messaging feature. After your purchase is approved, the Messaging tab appears on the left pane of your Bria.
4. Set up your Bria to use this feature. Follow the steps in Section 2.4 of *Bria iPad Edition User Guide*.

Keep Alive for TCP/IP

Bria iPad Edition now supports Keep Alive for TCP/IP as well as UDP. To set an interval, go to Settings > Accounts > Account Advanced > Keep Alive.

Sending DTMF

Bria iPad Edition now allows you to send inband DTMF in addition to RFC 2833 or SIP INFO.

Using Bria on iOS 5 – Setting up Notifications

If you are using iOS 5 or higher, you need to set up notifications so that you will receive notifications of incoming calls and messages. From the main iPad screen, tap > Settings > Notifications. Tap Bria and set up the following:

- Alert Style: Choose Banner or Alerts. This is a personal preference.
- Badge App Icon: On to display a number of notifications on the Bria icon.
- Sounds: On to enable the sound preferences you choose on Bria.
- View in Lock Screen: On to receive notifications when the iPad is locked.

Include Bria in the iPad notification center, and then you will see Bria incoming calls and messages by just swiping down from the top of the screen.

This package is an SSL implementation written by Eric Young (ey@cryptsoft.com).

The implementation was written so as to conform with Netscapes SSL.

This library is free for commercial and non-commercial use as long as the following conditions are aheared to. The following conditions apply to all code found in this distribution, be it the RC4, RSA, lhash, DES, etc., code; not just the SSL code. The SSL documentation included with this distribution is covered by the same copyright terms except that the holder is Tim Hudson (tjh@cryptsoft.com).

Copyright remains Eric Young's, and as such any Copyright notices in the code are not to be removed. If this package is used in a product, Eric Young should be given attribution as the author of the parts of the library used. This can be in the form of a textual message at program startup or in documentation (online or textual) provided with the package.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.

2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

3. All advertising materials mentioning features or use of this software must display the following acknowledgement:

"This product includes cryptographic software written by Eric Young (eay@cryptsoft.com)"

The word 'cryptographic' can be left out if the routines from the library being used are not cryptographic related :-).

4. If you include any Windows specific code (or a derivative thereof) from the apps directory (application code) you must include an acknowledgement:

"This product includes software written by Tim Hudson (tjh@cryptsoft.com)"
