

Bria 3 for Windows Quick Start Guide

Getting Started

After choosing a SIP VoIP service provider, you will need the following information:

- User name, password, and domain
- Firewall traversal and other network information; see “Configuring Accounts” in the user guide, “Using Bria 3 for Windows – Retail Deployments.

System Requirements

Processor	Minimum: Pentium 4@ 2.4 GHz or equivalent Recommended: Intel Core 2 Duo or equivalent, Video Card with DirectX 9.0c support Video Card with DirectX 9.0c support .
Memory	Minimum: 1 GB RAM Recommended: 2 GB RAM
Hard Disk Space	125 MB
Operating system	Windows® XP Service Pack 3 Windows Vista® Microsoft Windows® Vista® Service Pack 1, 32-bits and 64-bits arch Microsoft Windows 7 or Microsoft Windows 7 Service Pack 1 Microsoft Windows 8
Additional	Microsoft Windows Installer 3.1 Microsoft .NET 3.5 SP1 Microsoft VC 9.0 Runtime Service Pack 1 (Note that the installer will take care of installing those if you do not have them).
Connection	IP network connection (broadband, LAN, wireless) Periodically, Bria connects to CounterPath’s license server in order to verify that a valid license is being use. Therefore, at all times, Bria will need to have an internet connection.
Sound Card	Full-duplex, 16-bit; or use USB headset

The Bria Add-in requires a 32-bit version of Microsoft Outlook®. If you have a 64-bit version of Outlook, you can run Bria but they will not be able to use Bria Add-in.

Installing and Configuring Bria

Run the Bria setup executable file and follow the prompts in the install wizard.

Starting Bria

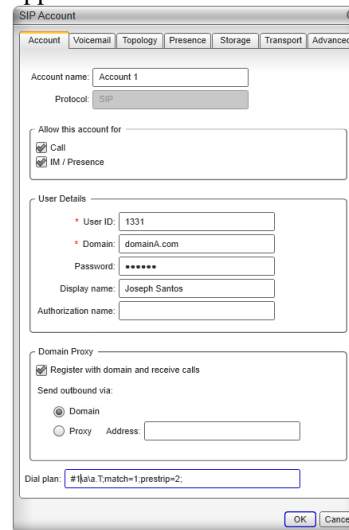

1. Start Bria. The Bria Login dialog appears.
2. Set the Profile to “No login required” and click Continue. The softphone appears.

Setting up Accounts

You must set up a SIP account to make phone calls.

1. Start Bria if it is not already running.
2. From the Bria menu, choose Softphone > Accounts. The SIP Account window appears.

3. Complete the User Details area with the information obtained from the VoIP service provider.
4. Complete the remaining tabs as specified by the service provider or to suit your setup. Settings that you may need to change immediately include:
 - Account tab, Domain Proxy area.
 - Topology tab, if your computer is on a network and/or behind a firewall.For more information, see the user guide.
5. Click OK; the account is created and registered. “Enter a name or number” appears in the call field.

You can now make calls with your new phone. If you have trouble making calls, see the Troubleshooting Assistant: Help > Troubleshooting.

Using XMPP

If your VoIP service provider has given you account information for an XMPP account, you must set it up separately, as described in the user guide.
