Release Notes for CounterPath Bria iPhone Edition CounterPath Bria iPad Edition Version 2.1.0

June 4, 2012

New and Changed Features for Bria 2.1.0

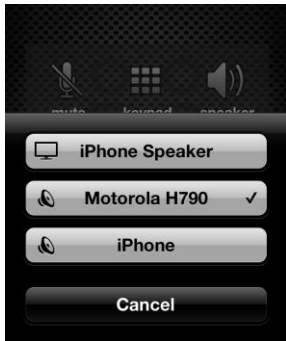

VP8 Video Codec

Bria now supports VP8 as well as H.264. Go to Settings > Advanced Settings to change priority if desired. Both codecs are enabled by default for users who have purchased the video call feature.

Group SMS

Now users can send SMS to more than one person at a time.

Bluetooth Switching during a Call

If the iOS device is connected to a Bluetooth headset, users can turn on or off the Bluetooth device during a Bria call by tapping the Speaker icon. The user will see choices for audio output as shown on the left: typically the speaker, the Bluetooth device, and the ear-piece (if supported on the device).

This feature is not supported on iPhone 3GS and older devices. On these devices, users can switch between the speaker and the Bluetooth device by tapping the Speaker button.

Mobile Data Usage

Bria now has two separate settings for using mobile data on Bria when Wi-Fi is unavailable. Go to Settings > Preferences.

Ability to Turn off STUN per Account

Bria has additional settings for STUN under Account Advanced. With these "Suppress STUN" settings, users can turn off STUN on a particular account. If users have multiple accounts and only some of them support STUN on their networks, STUN can be turned off on a particular account as follows:

1. Enable STUN under Advanced Settings, which works globally.
2. Go to the Account Advanced page of the account that does not support STUN.
3. Turn ON "Suppress STUN" in order to disable STUN on this particular account.

Uptime

Bria shows how long the app has been running. Go to Settings > About, and scroll down to the bottom.

Default Value Changes

These new default values affect only newly-created accounts after the update to 2.1.0; this does not change any values of existing accounts that users have created on Bria.

- Global IP Wi-Fi and Global IP Mobile are now turned ON by default.
- The default value of Network Traversal Strategy has been changed to Server Managed (no longer defaults to Default Configuration).

New Advanced Settings for SIP Accounts

Passive Session Timer and Enable IMS have been added; however, we recommend you leave these settings with their default values unless advised to change by your VoIP provider.

Resolved Issues

Issues Resolved in Bria 2.1.0

- In general, there have been improvements in the stability of Bria.
- The problem with logging into a Facebook account has been fixed.

/ Copyright (C) 1995-1998 Eric Young (eay@cryptsoft.com)

All rights reserved.

This package is an SSL implementation written by Eric Young (eay@cryptsoft.com).

The implementation was written so as to conform with Netscapes SSL.

This library is free for commercial and non-commercial use as long as the following conditions are aheared to. The following conditions apply to all code found in this distribution, be it the RC4, RSA, lhash, DES, etc., code; not just the SSL code. The SSL documentation included with this distribution is covered by the same copyright terms except that the holder is Tim Hudson (tjh@cryptsoft.com).

Copyright remains Eric Young's, and as such any Copyright notices in the code are not to be removed. If this package is used in a product, Eric Young should be given attribution as the author of the parts of the library used. This can be in the form of a textual message at program startup or in documentation (online or textual) provided with the package.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.

2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

3. All advertising materials mentioning features or use of this software must display the following acknowledgement:

"This product includes cryptographic software written by Eric Young (eay@cryptsoft.com)"

The word 'cryptographic' can be left out if the rouines from the library being used are not cryptographic related :-).

4. If you include any Windows specific code (or a derivative thereof) from the apps directory (application code) you must include an acknowledgement:

"This product includes software written by Tim Hudson (tjh@cryptsoft.com)"

THIS SOFTWARE IS PROVIDED BY ERIC YOUNG ``AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE AUTHOR OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

The licence and distribution terms for any publically available version or derivative of this code cannot be changed. i.e. this code cannot simply be copied and put under another distribution licence [including the GNU Public Licence.]
