Release Notes for CounterPath Bria iPhone Edition CounterPath Bria iPad Edition Version 2.2.0

September 14, 2012

New and Changed Features for Bria 2.2.0

AMR Wideband Codec as in-app purchase

Bria offers Adaptive Multi-Rate wideband (AMR-WB) audio codec as an in-app purchase.

After the purchase, the codec will be automatically enabled; however, we recommend that the user turns AMR-WB **off and turn it back on** again under Advanced Settings > Audio Codecs. This will ensure that the appropriate internal clock is used for calls.

ICE per Account

Previously ICE can be configured only globally (under Advanced Settings). Now each account can have separate ICE settings instead of global ones. Go to Accounts > Account Advanced and find Use ICE Mobile and Use ICE Wi-Fi. With this change, the Mixed Configuration strategy has been removed from Network Traversal Strategy.

Private Message Preview

A new setting allows you to keep your privacy on message alerts.

When this setting is on, Bria hides the actual content of the incoming message on the Lock screen and in the notification center. The default is off; go to Settings > Preferences > **Private When Locked** to turn this on.

Long SMS Messages

Bria now allows users to type a long SMS message.

The max number of characters in one SMS has been changed from 160 to 140. When a message exceeds 140 characters, the word count changes to S (for split). Then Bria splits the long SMS into multiple messages when sending.

Auto Complete when Typing Contacts in SMS

When sending SMS, users can type contact's name, then Bria suggests the contacts from their Contacts.

Ability to Turn Off Mobile Data Usage per Account

Bria has additional settings for mobile data usage under Account Specific Features of both SIP and XMPP accounts. If users have multiple accounts and want to use mobile data on only some of them, they can do this by enabling mobile data under Preferences and then disabling mobile data on a particular account. Users can also disable VoIP calls over mobile data network on a particular account. Go to Accounts > Account Specific Features > **Disable Mobile Data** and **Disable VoIP Calls**.

Easy-to-Read Call Statistics

Call statistics are much easier to read with a new formatting. Make a call and go to Advanced Settings, and tap Call Statistics. The statistics information refreshes every second.

Dedicated Intervals for IM and Presence

Bria now has two separate refresh interval settings for IM and Presence. **Publish Refresh** and **Subscribe Refresh** can be found under Accounts > Account Specific Features.

Resolved Issues

Issues Resolved in Bria 2.2.0

- Previously an incoming call screen remained displayed on Bria when the caller immediately cancelled the call. This issue has been resolved.
- In general, there have been improvements in the stability of Bria.

All rights reserved.

This package is an SSL implementation written by Eric Young (eay@cryptsoft.com).

The implementation was written so as to conform with Netscapes SSL.

This library is free for commercial and non-commercial use as long as the following conditions are adhered to. The following conditions apply to all code found in this distribution, be it the RC4, RSA, lhash, DES, etc., code; not just the SSL code. The SSL documentation included with this distribution is covered by the same copyright terms except that the holder is Tim Hudson (tjh@cryptsoft.com).

Copyright remains Eric Young's, and as such any Copyright notices in the code are not to be removed. If this package is used in a product, Eric Young should be given attribution as the author of the parts of the library used. This can be in the form of a textual message at program startup or in documentation (online or textual) provided with the package.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
3. All advertising materials mentioning features or use of this software must display the following acknowledgement:

"This product includes cryptographic software written by Eric Young (eay@cryptsoft.com)"

The word 'cryptographic' can be left out if the routines from the library being used are not cryptographic related :-).

4. If you include any Windows specific code (or a derivative thereof) from the apps directory (application code) you must include an acknowledgement:

"This product includes software written by Tim Hudson (tjh@cryptsoft.com)"
