# **Release Notes for CounterPath Bria iPhone Edition CounterPath Bria iPad Edition Version 2.4.0**

**March 14, 2013**

## New and Changed Features for Bria 2.4.0

### Emoji Emoticons

Users can add emoji in messages by using the iOS Emoji keyboard.

### Resending Messages

Bria now displays a red icon beside a message if an error occurred when sending the message. Tapping the red icon will resend the message.

### [iPad] Panel Resizing

Users can adjust the Main panel size by holding down the divider and sliding right or left.

### Separate Settings for SIP Registration Interval

Bria now has two settings for SIP registration interval under Account Advanced: for Wi-Fi and Mobile.

### Phone Status Messages

We changed phone status messages shown on the dialpad to more detailed ones.

- "No Service" indicates the device has no mobile or Wi-Fi network, or the mobile data is not allowed in Bria. Go to Preferences and turn on Use When Available to allow Bria to use data.
- "No Registration" indicates the SIP account has not been registered. Go to the Account screen and enable it.

### DTMF Fallback

Bria previously had a setting to send in-band DTMF as well as RFC2833 or SIP INFO. Now instead of sending both every time, Bria falls back to in-band DTMF **only when** it fails to send RFC2833 or SIP INFO. With this change, the setting "Also Send In-band DTMF" has been removed.

## Resolved Issues

### Issues Resolved in Bria 2.4.0

- There have been improvements on linking/merging contacts that are coming from different sources.
- In general, there have been improvements in the stability of Bria.
