

# X-Lite 4 for Windows Quick Start Guide

## Getting Started

After choosing a SIP VoIP service provider, you will need the following information:

- User name
- Password
- Authorization Name (if applicable)
- Domain
- Firewall traversal and other network information; see “Configuring Accounts” in the X-Lite User Guide.

## System Requirements

Processor	Minimum: Pentium 4@ 2.4 GHz or equivalent Recommended: Intel® Core™ 2 Duo or equivalent, Video Card with DirectX 9.0c support
Memory	Minimum: 1 GB RAM Recommended: 2 GB RAM
Hard Disk Space	400 MB
Operating system	<ul style="list-style-type: none"><li>• Microsoft Windows 7</li><li>• Microsoft Windows 8 and 8.1</li></ul> X-Lite can run in either 32-bit or 64-bit architecture in all these operating systems.
Connection	IP network connection (broadband, LAN, wireless)
Sound Card	Full-duplex, 16-bit; or use USB headset

## Installing and Configuring X-Lite

Run the X-Lite setup executable file and follow the prompts in the install wizard.

### Setting up Accounts

You must set up a SIP account to make phone calls.

1. From the main menu, choose X-Lite > Accounts. The Accounts window appears.

2. Complete the User Details area with the information obtained from the VoIP service provider
3. Complete the remaining tabs as specified by the service provider or to suit your setup. Settings that you may need to change immediately include:
  - Account tab, Domain Proxy area.
  - Topology tab, if your computer is on a network and/or behind a firewall.For more information, see “Configuring Accounts” in the X-Lite User Guide.
4. Close the Accounts window. The softphone displays “Enabling accounts”. When the account is registered, “Enter a name or number” appears.
5. Optionally, click Help > Troubleshooting and test your devices and audio quality (you must make a phone call in order to test audio quality).

You can now make calls with your new phone.
