**Release Notes for
eyeBeam 1.5.15
Patch 1**

June 12, 2007

New Features

The Polycom® Communicator C100S is now supported.

Known Limitations

Intel Phone Adapter

- Users employing the Intel® 600SM PCI phone adaptor card may experience an issue with being unable to dial more than seven digits. To modify the adaptor's driver to allow dialing more than seven digits, follow this procedure:
 - Access the computer's device manager by right-clicking **My Computer** and selecting **Manager** → **Device Manager**.
 - Look under "Sounds, Video, Game Controllers" for the 600SM PCI Phone Adaptor.
 - Right-click the device to open the **Properties** dialog for this device, then navigate to the **Properties** tab.
 - Modify the Country/Region setting as desired to an appropriate value for dialing more than seven digits.

Fixed Problems

The Severity field describes the impact of a problem:

- B: Blocks development and/or testing work
- C: Critical problem that crashes, or results in loss of data or severe memory leak
- M: Major, resulting in major loss of function.
- N: Normal.
- Min: Minimal, resulting in minor loss of function.
- E: Enhancement

The priority field describes the importance and order in which a problem bug should be fixed. P1 problems have the highest priority.

Severity	Priority	ID	Description
B	P1	6889	crash for regnow basic brand when receive invite with video sdv
B	P1	7660	upon upgrading from 1.5.14.1 to 1.5.15 head presence for all contacts lost
